

MediVault

CrewzNet

Functionalities Offered

- Vault where users can categorically store their health reports, vaccine cards and prescriptions.
- NGO's can register their vaccination camps on the website which would help in channelising the publicity of camps thus increasing the turnout of people at camps.

Functionalities Offered

- Notifies user whenever a vaccine is available
- Vault where users can categorically store their health reports
- Removing myths about Covid vaccines prevalent in society

Functionalities Offered

- Gives data of vaccination occurring at hospitals as well as at camps
- Busts myths and clarifies confusion regarding various available vaccines
- Precautions to be taken after vaccination
